

## Learning Activity Introduction Long-Term Care

### Introduction

The intent of this guide is to assist State Agency (SA) Preceptors and/or Training Coordinators, by providing learning activities to reinforce the knowledge while training new surveyors.

Use each of these activities in the training and development of new surveyors. Each activity contains instructions and lists the resources needed in order to conduct the activity with either an individual new surveyor directly or within a classroom based environment.

Preceptors may use these activities in combination with field experiences and/or basic training topics. In many cases, these activities will provide opportunity for further guided discussion with the new surveyor. You may download and add your state regulations and verbiage to these as well.
